

A Contractor's Guide to Claims on LTA Projects

We are pleased to announce that we will be running a Seminar exclusively for contractors working on the Singapore MRT (Metro) and under the LTA Contract. The Seminar will be run by Systech Regional Director for APAC, Luke Walker and Associate Director Kashyap Mothali.

Topics Covered

The seminar will cover a number of issues relating to construction claims on LTA projects, specifically to the Singapore MRT, and will draw on our specialist expertise in this area, providing a valuable insight into establishing a successful construction claim:

- Pitfalls of LTA Programme Architecture
- Choosing the right delay analysis methodology
- EOT Claims: discreet event vs consolidated approach
- Dealing with concurrency
- Effective disruption claims

Systech International

Systech International provides responsive, high quality managed services to contractors, supporting them in the delivery of projects on time and within budget.

Systech International is the leading global provider of commercial management, contract administration, planning and scheduling, claims, expert witness, dispute resolution, legal, training and visualisation services on construction, infrastructure and energy projects.

Systech International has a global presence with offices across Asia Pacific, Europe, the Middle East, Africa and the Americas.

Presenters

Luke Walker - Regional Director, APAC

Luke's professional career spans over 25 years in the construction industry involved in the commercial and contract management of major international infrastructure projects in the UK, Middle East, China and South East Asia. He is experienced at drafting contracts and working on amended forms of contracts. Luke has a proven track record in Asia Pacific as an expert in claims production, dispute resolution, commercial, contract administration and cost management of MEP, special systems and civil construction works including managing large teams.

Kashyap Mothali - Associate Director

Kashyap is a highly experienced delay analyst with 16 years of project controls, forensic delay analysis and contractual planning experience. He has worked on major infrastructure projects in USA, Africa, India and South East Asia with a proven track record in the metro and rail, energy, aviation and highways sectors.
