

Our Services

Systech International has a 25 year track record of success supporting contractors in their delivery of construction, infrastructure and energy projects on time and to budget.

We combine our international expertise with local knowledge and experience to provide responsive, high quality managed services over the full lifespan of projects – from bid to handover – from our offices in Europe, Middle East and Africa, Asia Pacific and the Americas.

Commercial Management

Independent, pro-active and disciplined cost control and contract management to deliver a “no-shock” financial conclusion

Scheduling & Planning

We do not simply prepare the programme; we bring new ideas, fresh thinking and solutions with a focus on identifying opportunities to reduce time and manage risk

Risk Management

The identification, evaluation and management of reputational, contractual, financial and commercial risks over the lifetime of a project

Claims Management

Honest appraisal, strategic guidance and the preparation of time and cost entitlement documentation that is technically, legally and commercially accurate

Dispute Resolution

Commercially focused and co-ordinated contractual, quantum, forensic delay and legal service from a single business from crystallisation of the dispute to enforcement of the outcome

Expert Witness

The provision of quantum and time experts with testimony experience, supported by our global operation

Legal

Solicitors specialising in contentious and non-contentious construction issues with an emphasis on avoiding, managing and resolving disputes

Visualisation

High impact presentations, video and apps to help contractors win bids and communicate key claim and dispute resolution messages

Training

A range of client focused training programmes delivered by our consultants with hands-on practical experience
